

Supplementary Figure 1 (F-00340-2019)

Supplementary Figure 1. Effect of diabetes and treatments on body weight. Data shows the weekly body weights of mice after 3 hours of fasting. Data is shown for groups of diabetic *Nos3*^{-/-} mice which were untreated (STZ w0-15), given food with PF-04634817 (STZ+CCR2A w2-15 and STZ+CCR2A w8-15), given ACEi in drinking water (STZ+ACEi w8-15), or given both PF-04634817 + ACEi (STZ+CCR2A/ACEi w8-15). Age-matched non-diabetic *Nos3*^{-/-} mice were used as controls (Non-Diabetic). Data = mean \pm SEM. n=15.
