Enabling researchers to increase the discoverability and impact of their research data collections + digitising some incredible, rare items for greater access

MY DIGITAL TOOLKIT

OpenRefine

HOW I USE MY FAVOURITE TOOL TO ENHANCE

MY WORK: Whether it's importing research materials into *monash.figshare* or a collection of digitised rare books into *Monash Collections Online*, **OpenRefine** enables me to rid my source data of troublesome inconsistencies and characters that would either break the upload script or render the metadata unusable for researchers. **OpenRefine** allows me to work more efficiently, cleans my data, and helps me deliver accessible research collections.

NEW TOOLS I'M INTERESTED IN: #DATAVIZ

Power BI

MONASH DATA
FLUENCY
